QA Testing Report: Codemify.com

Project Type: Manual Testing Website: https://codemify.com

Tools Used: Jira, Excel, Google Chrome

Prepared By: Kashish Khurana

Date: July 2025

★ Objective:

To perform **manual UI and form testing** on Codemify.com to identify usability issues and functional bugs, and report them in a structured format.

Project Summary:

Category Count

Bugs Reported 2

Tasks Created 2

Status Completed

Task 1: Button Redirection Testing

Task Title: Test Redirection for Buttons on "Student Reviews" Page **Description:** Ensure all CTA buttons redirect to correct destinations.

Steps to Reproduce:

- 1. Open codemify.com
- 2. Scroll to the "Student Reviews & Testimonials" section
- 3. Click the yellow "Try Intro Week!" button

Expected Result:

Redirects to Intro Week course page

Actual Result:

Redirects to One week / web / 20\$ page incorrectly

Task 2: Validate Contact Us Form Fields

Task Title: Field Validation for Contact Form

Description: Validate form behavior when incorrect data is entered in name, phone, and

message fields.

Steps to Reproduce:

1. Go to the Contact Us page

- 2. Enter invalid data in Name and Phone (e.g., 1234, abcd)
- 3. Leave the Message field blank
- 4. Click Submit

Expected Result:

- Validation errors appear immediately
- Form should not submit until errors are corrected

Actual Result:

- No real-time validation
- Errors shown only after clicking Submit

Bug #1: Incorrect Redirection on Reviews Page

Title: "Try Intro Week!" button redirects to the wrong page

Page Affected: Student Reviews

Steps to Reproduce:

- Visit homepage
- Scroll to Testimonials
- Click CTA button

Expected: Redirects to Intro Week

Actual: Redirects to wrong course page

Bug #2: Missing Real-Time Validation in Contact Us Form

Title: Contact form allows invalid data with no real-time validation

Page Affected: Contact Us

Steps to Reproduce:

- Enter abcd in Phone field
- Enter 1234 in Name field
- Leave Message blank
- Click Submit

Expected:

- · Validation occurs while typing
- Errors appear in real-time

Actual:

- No real-time validation
- Error appears only after clicking Submit
